

CANNA COCO

ALL VALUES ARE PER GALLON

rooted cuttings - 18 or 24 hours of light PH 6.2

rhizotonic

day 1 - 4 18ml Use Rhizotonic and fresh water for first 4-5 days After roots appear

Use blue light during veg stage and first 2 weeks of flower to improve internodal spacing & to reduce stretching

vegative stage - 18 hours of light PH 6.2

	Coco A	Coco B	Rhizotonic	CannaZym
week 1	4ml	4ml	18ml	
week 2	6ml	6ml	10ml	10ml
week 3	8ml	8ml	10ml	10ml

ALWAYS:
Add Coco A and dilute in reservoir before adding Coco B !!!!
Do Not Mix them together in concentrated form

**PROGRESSIVE
GROWTH
HYDROPONICS**

Transition to flower: (hardest time of a plants life)
All transplanting should be done. Make sure daytime temp is around 80°. Very important that nighttime temperatures stay above 70°, this will improve your internodal spacing & reduce stretching. First week of flower keep your lights at least 24" above plants

**TOLL FREE
1-877-756-4769**

flowering stage - 12 hours of light PH 5.7

	Coco A	Coco B	Rhizotonic	PK 13-14	Canna Zym
week 1	10ml	10ml	3ml		10ml
week 2	12ml	12ml	3ml		10ml
week 3	10ml	10ml	3ml		10ml
week 4	9ml	9ml	3ml	6ml	10ml
week 5	8ml	8ml	3ml	6ml	10ml
week 6	8ml	8ml	3ml	6ml	20ml
week 7	7ml	7ml			20ml
week 8					

CANNA COCO

Use only Canna Coco Mix as your growing medium. Canna Coco is specially designed to work Only with the Coco Growing Medium

Do Not use hydrogen peroxide with Canna products.

When Transplanting:

Pre Soak grow medium with 18ml / gallon of Rhizotonic & fresh water. First watering after transplant also use Rhizotonic & water

Ripening stage:

Use fresh water only for minimum 7 days
Lowering temperature in dark cycle during last week will promote higher crystal & resin production.

If your plants become stressed at any stage:

Some stresses can be caused from: lights being too close / over fertilization / insect infestation / temperature fluxuation
Raise the lights to 24" , water plants with 18 ml / gallon of Rhizotonic and water for 2 waterings, when plants show signs of growth again, continue with regular feeding program.

Ensure that your plants dry out between watering. Once a month pass lots of water (2X usual) through pot for removal of salt buildup
